Bikash Ghimire
Software Engineer

Software Engineering Professional specialized in developing and maintaining web applications using React, TypeScript, Next JS, and Storybook, collaborating with a cross-functional team. I focus on code quality, testing, debugging, and feature implementation following agile methodologies. Graduated with a Bachelor's in information technology, I possess proficiency in various languages, frameworks, and databases, and constantly seek to enhance my skills through online courses and certifications. Passionate about staying updated with the latest web development trends, I seek challenging opportunities to apply my expertise in creating impactful solutions. Currently, I am persuing Masters Degree in Software Engineering at Åbo Akademi University aiming to graduate by spring next year.
